DETAILED ACTION

Allowable Subject Matter

1. Claims 1-3 are allowed.

Reasons for Allowance

2. The following is an examiner's statement of reasons for allowance:

The primary reason for the allowance of claims 1-3 is the inclusion of the limitations of: multiple first elongated holes adapted to be defined in opposite sides of the backboard to correspond to the extensions; multiple second elongated holes adapted to be defined in opposite sides of the lens to align with the first elongated holes of the backboard such that the extensions extending through the corresponding first elongated holes of the backboard are able to extend through the second elongated holes of the lens; a riveting device adapted to a first corner of the lens to allow the lens to be pivotable relative to the box; and a cam adapted to be rotatably mounted on the bottom face defining the top opening of the box and extending out of a cam hole in a second corner of the lens opposite to the first corner such that pivotal movement of the cam is able to force the backboard to move linearly and thus relative position between the lens and the backboard is adjusted. It is these limitations found in each of the claims, as they are claimed in the combination that have not been found, taught or suggested by the prior art of record, which make these claims allowable over the prior art.
